

MINI-PUMPERS

FIRETRUCKS.COM

WHEN BIGGER ISN'T NECESSARILY BETTER

The HME Mini Pumper – a great option when bigger isn't necessarily better. Mini pumper performance is often under-rated; water flow of up to 1500 GPM, multiple crosslay options, lots of compartment space, deck gun and the ability to lay a supply line. All available as a compact solution at a competitive price.
